

## Envirotrays

**Prevent spillage of lubricant, fuel, coolant etc.**

Available in full pallet, half pallet and workshop spill trays

400 mm x 600 mm and 800 mm x 600 mm.

**Manufactured from hard wearing polyethylene, UV stable.**

Full and half pallet trays are available with fork lift tie down frames fitted at each corner with a solid tie point for transportation of drums and components etc, eliminates any spillage onto vehicle deck.

## Fireproof Engine Covers

**Fire in mobile plant threatens life, property and business continuity.**

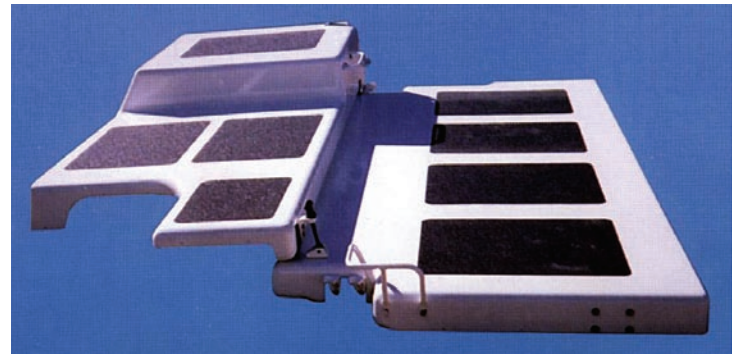

Ordinary combustibles or flammable liquids can be ignited by the engine, turbo, exhaust manifold or electrical components. In little time the entire vehicle can be engulfed in fire.

### APPROVALS

AS 1334.9-1982; AS 1334.10-1994; BS 2050-1978, Method A4.2;  
ASTM E 1354-92

AVAILABLE AS EXCHANGE UNITS FOR CATERPILLAR TRUCKS

A burst hydraulic hose or faulty fitting can provide a continuous spray of burning fluid, which can only be extinguished if accessible. Such fires have been known to destroy engine covers and endangered the life of the operator by restricting safe egress from the machine and exposing him to toxic fumes.

The product FSP14A is an acrylic composite material developed as an alternative to fibre reinforced plastic with fireproof characteristics. FSP14A has the ability to be applied over a variety of surfaces and moulded into almost any shape.
