## INTRODUCTION

FSP Australia Pty Ltd is wholly Australian owned company, based at modern premises in the Brisbane area. Formed in 1990 the business was formed as the introduction of Mine Regulation MDG15 increased demand for a fire resistant material that could be utilised in a variety of applications.

The initial product offering of Fireproof Engine and Wheel Motor Covers has steadily expanded to include a range of polyethylene based hose reels, lockers and cabinets, wheel chocks and blasthole savers.

All of these products share the features of being absolutely corrosion free, are non-toxic in nature, resilient, UV resistant, engineered and manufactured to exacting standards to suit the requirements of the Mining industry.

FSP hold several Australian Design Registrations, have the tenacity, ability and flexibility to develop new products to offering genuine solutions to the problems encountered by the Mining industry.

**Equipment Placement is actively developing the export market for these products.**

## Hard Wearing Lockers

**MANY COLOURS AVAILABLE!**

Do you still have those old steel lockers?

The ones that don't lock properly or have been damaged through misuse, abuse or simply come to the end of their natural life?

Then why not consider the cost effective, low maintenance and environmentally friendly alternative to the traditional metal locker?

FSP has a range of lockers to suit all your needs.

Tough! Impact-resistant! UV stable! And, available in almost any colour.

FSP lockers have a unique interlocking system so once in place they cannot be easily separated.

Is it an endless task keeping the outside tops clear of someone's unwanted items? No problem with the FSP range as they come with an optional 45-degree sloping top so nothing can be placed on top.

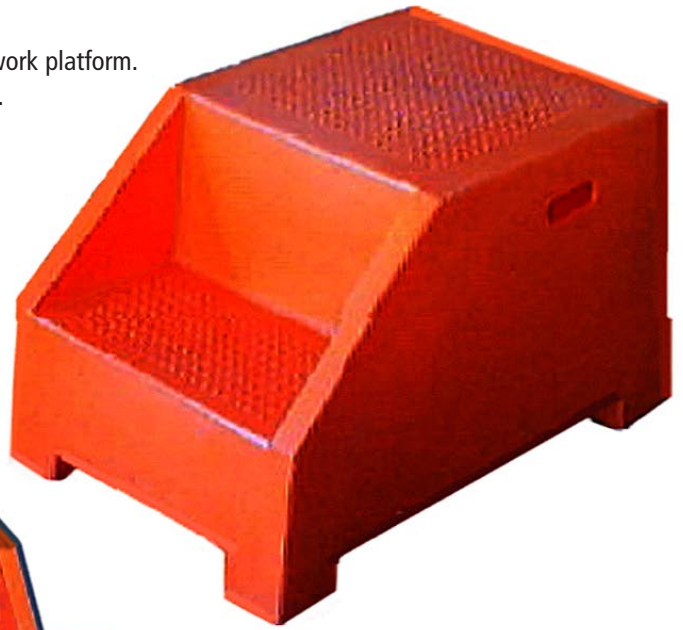

Contact Equipment Placement for further details and to arrange for a representative to visit your facility with a sample of our product.

## Work Platforms

Improve safety in the workplace with this lightweight, durable and stable work platform. Manufactured in hard-wearing UV stable and impact resistant polyethylene.

- Roto moulded polyethylene
- Moulded handles for easy mobility
- UV stable
- Lightweight
- Moulded non-slip tread
- Impervious to salt and most acids
- Strong
- Non-corrosive

Size: Left/right: 750mm Front/back: 500 mm Height: 500 mm

## Cable Crossovers

Protect cables, hoses and pipes from accidental damage from vehicles. Guards against crushing, scuffing and entanglement. Bright yellow colour alerts drivers and encourages safe driving speed.

- Heavy duty polyethylene
- Lightweight
- Moulded non-slip tread
- Impervious to salt and most acids
- Strong
- Non-corrosive

# Ozbox Storage Module

The functional alternative to heavy steel storage compartments.

Extra heavy duty polyethylene construction to withstand harsh Australian road and weather conditions.

Fits most standard tray top utes.

- Durable polyethylene construction
- UV stable
- Lockable compartments
- Optimum weight
- Impervious to salt and most acids
- Strong
- Non-corrosive

# Mobile Drain Trolley

Ideal for fluid servicing on large dump trucks

- Polyethylene tank with 400 litre capacity
- GRP top grid with anti slip, strong enough to stand on if required
- Easy to move around
- Large capacity for servicing vehicles efficiently
- Quality fittings used throughout

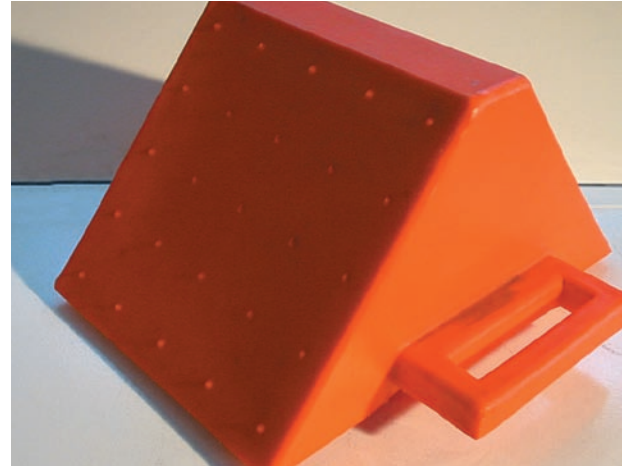

Pneumatic tyres fitted as standard  
Kick stand ensures stability when in use

# OzChocks

Manufactured in hard-wearing UV stable and impact resistant polyethylene and available in several sizes.

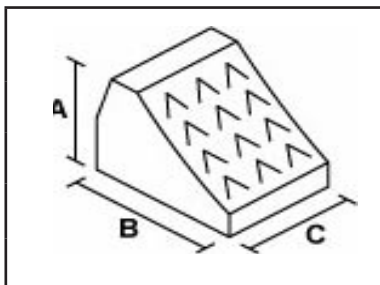

- Polyethylene
- High impact strength
- Moulded handle
- Rubber traction pads
- UV stable
- Safe
- Lightweight

Australian Design Registration No 127909

## Truck Mounted Installations

Available for all makes and models of trucks, can also be mounted on other mobile equipment such as loaders and graders etc. Durable steel brackets manufactured to suit a wide range of vehicles.
